DETAILED ACTION

Response to Arguments

- 1. This action is in response to the communication mailed on December 3, 2008 applicant has submitted an amendment, filled on February 18, 2009.
- 2. Claims 1, 3, 4 and 6-8 are currently pending in this application, with Claims 2, 5, 9 are cancelled without prejudice.
- 3. Applicant's arguments with respect to claims 1, 3, 4 and 6-8 have been considered but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 1 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The amended claim 1 recites the limitation "as an identical signal". However, the aforementioned limitation was not described in the specification. As a result, the specification fails to convey to one skilled in the art at the time the application was filed, that the inventor(s) had possession of the claimed invention.

Art Unit: 2617

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 1, 3, 4 are rejected under 35 U.S.C. 102(b) as anticipated by US Patent Application Public 20030224729 (hereinafter Arnold).

Regarding claims 1, Arnold disclose "A transmission system" (see paragraph 7) comprising: a first transmitter having a first antenna" (see paragraph 40, Fig. 3, Arnold discusses as antenna(s) in block 310 and paragraph 79, FIG. 17, a wireless data receiving arrangement that supports a plurality of wireless data transmitter units can include any number of receiver channels. Receiver 1100 generally includes an antenna structure, which may include a first antenna 1102 and a second antenna 1104); and "a second transmitter having a second antenna" (see paragraphs 40, 79), "wherein, in a connecting state where said first transmitter and said second transmitter are connected" (see paragraph 43 and Fig. 5, Arnold discusses as controller 404 includes one output 412 corresponding to a first transmit channel and another output 414 corresponding to a second transmit channel) said first antenna and said second antenna simultaneously transmit said identical information as an identical signal" (see paragraphs 8, 36, 40, 41, 43, 58 and Fig. 3-5, transmitter arrangement 308 is configured to transmit identical data packets at two different RF carrier frequencies. Antenna structure 310, which can be configured to enhance the quality of the RF transmission, propagates the data packets over a wireless link 312);

Regarding claims 3, Arnold disclose "wherein, said first transmitter comprises an operating means which conducts a transmitting operation, and radio field intensity outputted from said first antenna is set higher than the radio field intensity outputted from said second antenna" (see paragraphs 50, 68 for signal strength).

Regarding claim 4, Arnold discloses "first antenna and/or said second antenna is a loop antenna" (see paragraph 69, antenna 902 may be a monopole or dipole electric field antenna or a magnetic field loop antenna);

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claims 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent Application Public 20030224729 (hereinafter Arnold) in view of US Patent Application Public 20040014457 (hereinafter Stevens).

Regarding claims 6-8, Arnold discloses all the subject matters of the claimed invention concept except "biometric function to measure biometric

information". However, Stevens teaches "biometric function to measure biometric information" (see paragraph 34-54).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was make to modify the Arnold invention by providing mobile device can use for multiple functions as taught by Stevens (see paragraph 13).

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHUONG A. NGO whose telephone number is 571-270-7264. The examiner can normally be reached on Monday through Thursday 6:00AM to 4:30PM.

Application/Control Number: 10/594,972 Page 6
